

## The only way to replace fossil fuels with renewable energy is to reinvent battery technology

A newer technology is needed to replace the current lithium battery. Higher energy density, faster recharging cycles and less toxicity is required to turn this vision in to reality.

This will be an event that will disrupt both the energy market and traditional auto manufacturers.

Blackstone's strategy is to take mining interests in battery metals to secure supply for the next generation of battery technology. To support this activity and its battery technology research programme it also invests in cashflow assets.

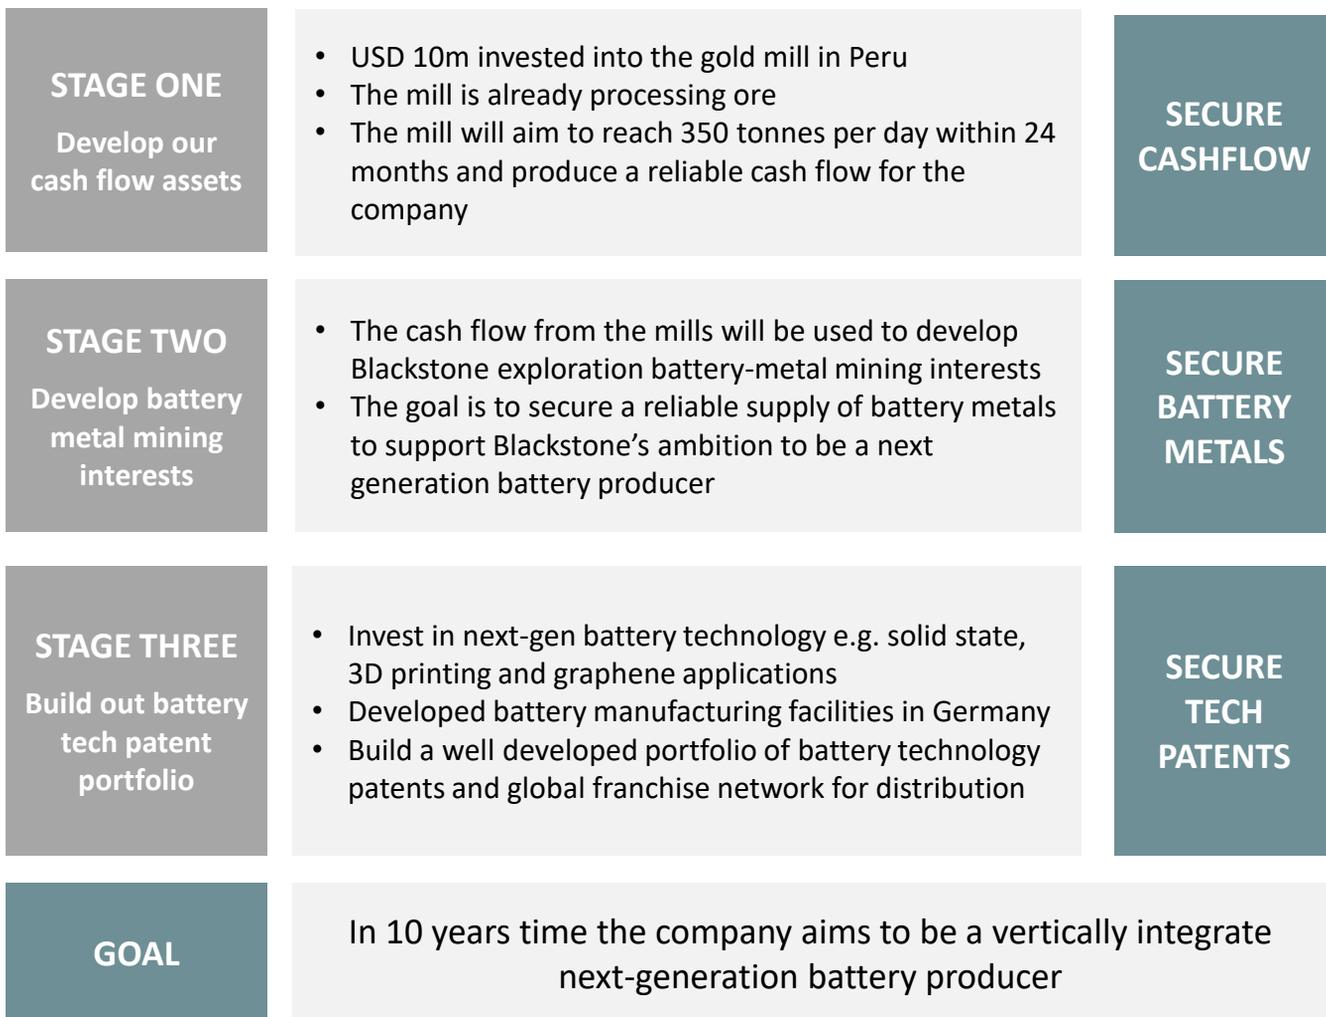

### Why Blackstone Resources?

There are two powerful structural trend that will reshape our global economy in the twenty-first century:

1. The electrifying of global road traffic
2. The replacement of fossil fuels with clean and sustainable energy

There are few companies that have a strategy to offer broad exposure to these two trends.

Corporate strategy		
	Cash-flow assets 	Battery metals and technology 
Strategy	How we will <u>pay</u> for our vision	How we <u>realise</u> our vision
Portfolio	<b>Production:</b> Peru: <i>gold and silver</i>	<b>Exploration:</b> Canada: <i>cobalt, nickel and copper</i> Norway: <i>rare earths, nickel und copper</i> Chile: <i>lithium</i>  <b>Battery technology:</b> Switzerland: <i>solid state batteries, 3D printing</i> Germany: <i>manufacturing and research.</i>
Size	<b>SMALL TO MEDIUM</b>	<b>MEDIUM TO LARGE</b>
Cash-flow	<b>NEAR TO MEDIUM TERM</b>	<b>MEDIUM TO LONG TERM</b>
Risk	<b>LOW</b>	<b>HIGH</b>
Return	<b>MEDIUM</b>	<b>HIGH</b>

Blackstone's business involves a number of risks. These risks should be carefully considered. The following are some of the key risks and uncertainties but not all the key risks and uncertainties are generally associated with the commodity business. However, the risks described below are not the only ones Blackstone faces. Additional risks not currently known to us or that we currently deem immaterial may also impair our business operations.

There is uncertainty regarding Blackstone's ability to achieve, sustain or increase profits; there is no assurance Blackstone will be able to fund its operations with existing capital or indebtedness, or that it will be able to raise additional amounts to fund operations, including through the raising of further capital, borrowing of additional funds or otherwise; there is uncertainty regarding the future value of an investment in Blackstone's securities.

Blackstone's business and operations are subject to various regulatory and legal risks including: difficulties and uncertainty regarding the results of government agencies or customers; the unpredictability of protection afforded by any licence rights or other mining property. Blackstone is subject to a variety of business and operational risks and uncertainties including: the cost of any future acquisitions and the ability to integrate any acquired businesses; potential contractual disagreements and negotiations with third parties; the ability to obtain adequate insurance against potential risks; the ability to attract and retain management personnel; uncertainties associated with the timing, prospect and successful execution of the development, acquisition, exploration or exploitation of new mines and or mining rights and existing mines and or mining rights, of new customers or existing customers, of acceptance and demand for new commodities and existing commodities; the ability to obtain anything supplied by third parties on satisfactory terms; the ability to develop, and ongoing reliance on, key strategic alliances, and partnering arrangements; risks relating to the uncertainty of tax rate assumptions, currency exchange rate and interest rate fluctuations; risks with the ability to keep up with rapidly changing technology, rapidly changing commodity prices; risks associated with the ability to meet demand and manage growth, including the ability to potentially expand to other countries anywhere in the world with natural resources reserves and or generally into international markets; and fluctuating operating results.
